Bangalore

Dear Raghav

I would like to thank you and SITARA Technologies for the timely and proactive support rendered to our key management initiatives deploying the CMMI and People CMM process frameworks. Your professional interpretation of both these frameworks has grown a rich pool of internal expertise in the organization.

Training provided on the SEI Authorized Introduction to CMMI and Introduction to People CMM was exceptional. Strategic consulting provided by SITARA was very forward looking in terms of Intelligroup's growth objectives using SITARA Process Jewel Box and SITARA's competency Architect while integrating concepts such as the Leadership Pipeline. SITARA's recommendations on the strategic advantages of deploying a much broader software engineering competency development framework such as CMMI alongside an organizational development framework such as the People CMM is much appreciated after we have witnessed its potential firsthand.

SITARA's SCAMPI and People CMM appraisals were very thorough in their execution, using the necessary diagnostic checks before embarking on formal assessments.

We look forward to a continued partnering relationship with SITARA in our quest to establish higher benchmarks for process maturity and people capability.

For Intelligroup Asia Pvt Ltd,
